

AGING SKIN: THERAPY BY RADIO FREQUENCY

Mario Pepe MD*, Vincenzo Varlaro MD**

*** Cosmetic Aesthetic Medical International Group (CAMIG), Salerno (Italy)**

**** University of Camerino (Italy)**

The “*cutis lax*” of the face, neck, abdomen, upper limb root, trochanteric regions are the expression of collagen and elastin involution and loss of muscle and fat tissue.

Radiofrequency works by optimizing the collagen structure of dermis. A clinical case will be presented.
